

From a great past ... to a great future!

They were the first years of the last century when the Counts of the Azzoni Avogadro, lovers of the Tuscan countryside and landscape, left the Veneto and moved to La Rotta, a small village bathed by the Arno river halfway between Florence and Pisa.

Here, in an area rich in agricultural and wine production, the Conte Aldobrandino prepared the fertile lowland lands to be cultivated with arable land and vegetables, while the hilly lands were destined to viticulture which, still today, represents the pride of the activity, as well as the main focus of the business.

Later it was Conte Roberto - son of the pioneer Conte Aldobrandino - to make a change in the direction of the company, giving rise to a slow and gradual transformation of the territory, diversifying the traditional crops, introducing poplar cultivation and establishing a hunting reserve with pheasant breeding. Thus, thanks to a knowledge handed down with perseverance and passion from generation to generation, the company remains today.

Count Aldobrando degli Azzoni Avogadro comes from many generations of winemakers, all with a passion for wine and a love of the earth. In the last century, the Counts left the Veneto region and moved to the heart of Tuscany. The land was rich in agricultural and wine traditions and so began the cultivation of the vineyard. Today, the Estate comprises of 285 hectares, 18 of which are vineyards.
